EXPERIENCE

Full-Stack Developer Intern

Sep 2025 – Aug 2026

Insurance Corporation of British Columbia

North Vancouver, BC

- Conducted security testing and verification for internal site updates to ensure compliance and data protection
- Developed and updated **over 90 web forms** using **Java Server Pages** and **Active Server Pages**, decreasing turnaround time on the backlog of the forms queue
- Added unit testing with **80%** test coverage for a **C#** application to improve code reliability and maintainability
- Refactored SharePoint pages, redirecting to new managed pages while preserving access to legacy versions
- Upgraded **8** legacy SharePoint 2016 web parts and built **4** new web parts in **TypeScript** for migration to SharePoint Online by modernising outdated code, maintaining existing functionality, and ensuring UI/UX consistency across platforms

Programming Intern

May 2025 – Aug 2025

Yatabase

Remote, US

- Updating **Python** notebooks working with AI APIs, to track the different API calls and to better manage costs
- Using **MongoDB** to test different the different surveys and manage the information they store in the database
- Integrating a **Weaviate** vector database into the notebooks to manage survey responses and enable chat functionality to gain better and quicker insights from the responses
- Implementing **react-i18next** and creating json translation files to handle translation for **4** different languages

PROJECTS

TripSitter | *TypeScript, React.js, Vite, Supabase, Figma*

Feb 2026 – Present

- Building a full-stack travel management application using **Vite**, **TypeScript**, **React**, and **Supabase** to track itineraries, logs, and statistics from past and upcoming trips
- Implemented **Supabase**-backed authentication and account creation, enabling users to manage and sync their trips across multiple devices on the web
- Implemented interactive map visualisation using **react-leaflet**, rendering custom markers for trip destinations
- Planned enhancements include a full trip-sharing system with collaborative itinerary editing via trip members

Video Game Projects | *Unity2D, C#, Illustrator, Libresprite, Git*

Sep 2024 – Present

- Participated in multiple game jams ranging from 3-day to week-long events, focusing on rapid development.
- Developing games using **Unity2D** and **C#**, implementing game mechanics, physics, and interactions.
- Created game assets and animations using Adobe **Illustrator** and **Libresprite** to design engaging visuals.
- Managed time effectively under strict deadlines to complete and submit playable game prototypes.
- Designed levels for **Mt Stringmore**, ensuring an enjoyable and natural difficulty progression for players
- Participated in weekly scrums and uses a Kanban board to keep track of all the progress made by teams

BOLT UBC Bootcamp 2025 Datathon | *Python, Tableau, NLP*

Mar 2025

- Analysed resort expenditure and injury incident data to derive insights on spending patterns and safety concerns
- Developed a logistic regression model using **Python** libraries to predict necessity of hospital transport
- Utilised **Tableau** to create interactive visualisations ensuring clear and impactful presentation of findings
- Performed sentiment analysis on customer reviews using NLP and **VADER** sentiment analysis to determine common complaints and areas for improvement

TECHNICAL SKILLS

Languages: Proficient in Java, TypeScript, C#, with experience in Python, R and C/C++.

Developer Tools/Platforms: Git, VS Code, Visual Studio, IntelliJ, WebStorm, PyCharm, Blue Prism, Vite

Frameworks: Unity, React.js Node.js

Libraries: pandas, NumPy, scikit-learn, nltk, pymongo

EDUCATION

University of British Columbia

Vancouver, BC

Bachelor of Science in Computer Science and Statistics (GPA: 3.85/4.33)

Sep 2022 – May 2027

Relevant Coursework: Basic Algorithms and Data Structures, Introduction to Software Engineering, Intermediate Algorithm Design and Analysis, Applied Machine Learning
